## What's New In Chords?

Chords is a free MIDI playback and sheet music notation editor. Oriented for guitars, it shows chord and scale diagrams. It also allows adding chords and scales to sheet music. Chords also supports multiple track playback and allows adding scales and chords to the sheet music. Windows version: Chords is available for both Windows and Macintosh. In order to install Chords, you have to download the installer available at the Chords download page ( Usage: Chords can be launched either by double clicking the file Chords.app or using the menu Command/Option + Space, then typing the name of the application. Chords is the name of the application shortcut that is made by the installer. Chords starts in the Chords play directory by default. In this directory, you can load a file or select a sequence (i.e. a MIDI file or a MIDI sequence). To use Chords, open the Chords Play window. Chords has three modes: • Standard: This is the normal mode. Here you can load a file or sequence, play a song with the MIDI sequence or add chords or scales to a sheet music. • Song (Frame by frame): By default, Chords plays a sequence one frame at a time. This mode lets you play a song in this mode. You can press the space bar to start playing the song. The menu song / Song (Frame by frame) lets you start/stop playing a song in this mode. • Song (Full song): By default, Chords plays a song in full (non frame by frame) mode. This mode lets you play a song in this mode. You can press the space bar to start playing the song. The menu song / Song (Full song) lets you start/stop playing a song in this mode. Note: There is a bug in Chords version 2.04c, when playing an open file. The file is displayed in the correct size in the Chords Play window. But when you hit the space bar to start playing the song, the file will be displayed in its real size. In this case, use Song (Frame by frame) or Song (Full song) mode if you want to play a song. In addition to playing a song, the menu item playlist / Playlist lets you change the playback mode from frame by frame mode to the standard playback mode. When playing a song in the frame by frame mode, you can select the playlist mode and the playback will switch to frame by frame mode or standard mode. The menu item play / Play lets you reset the song sequence or a frame or the current scale or scale diagram. The menu item songs / Song and the menu item song / Song lets you add or delete chords to a song

---
