Ocean Mail Server Crack +

Ocean Mail Server is a secure and feature rich mail server with support for SMTP, POP3 and IMAP4. It offers customizable web mail, a web based remote administration interface and support for LDAP and SSL. Ocean Mail Server is an email tool that allows you to send and receive emails. It also includes content filtering features, POP3 retrievals, ODBC support, antivirus integration, mailing lists, static routing, and a variety of security features to prevent abuse and spamming. Each user can have custom account settings including aliases, redirections, signatures, POP3 retrievals, address book and custom anti-spam filter settings. Main features ☑ SMTP - Receive incoming mail. Secure your SMTP with options including SMTP Authentication, Tarptitting, IP transfer limits and hop count limits ☑ POP3 - Use

almost any mail client to read and reply to your mail ☑ Remote Admin - Remotely access to your settings, user accounts and logs via any web browser ☑ Outgoing Mails - Handle your own outgoing mail with support for MX lookup based or direct relaying delivery methods ☑ Secure Login Methods - Protect your login details with SASL methods such as CRAM-MD5 or CRAM-SHA1 ☑ Anti-Hammering - Protect user login details by preventing brute force attacks ☑ IP Restrictions - Secure your mail services using IP access rules ☑ Advanced Port Control - Complete control over how ports are opened and time-out values ☑ INI Based File System - Manage your settings and users externally by editing the setup files ☑ Clustering - Improve performance and manage large numbers of users using multiple mail servers. New faster and more load bearing accounts system ☑ True Multiple Domain Support - Hierarchically arranged 'domaingroupuser' accounts with added support for alias and backup domains. ☑ Static Routing - Set up mail routing rules to help integrate multiple servers and customize mail routes for particular domains. ☑ Mailing Lists - Send bulk mails to multiple email addresses and accounts. Opt-in mailing lists allow users to automatically add and remove themselves ☑ Redirection - Redirect incoming / outgoing mails to other email addresses ☑ Auto-Responses - Automatically send a mail in response to new incoming mail. ☑ Alias Addresses -

Ocean Mail Server With Key For Windows

Ocean Mail Server Activation Code is the premier secure and feature rich mail server that makes it easy to send and receive your email. It includes advanced spam and virus protection, eliminates spam & viruses, allows for clean and unfiltered logons, allows for an advanced and custom setup of domains, receives and sends mails via POP3 and IMAP4, handles all of your incoming and outgoing mail with security and ease of use in mind. Why use Ocean Mail Server? Ocean Mail Server makes it easy to send and receive your emails. Whether you want to be able to have your own domain, sell adverts or simply have the freedom to say what you want without having to worry about the mails being caught, this is the right mailserv for you. Being a community mailserv, we are all located in various parts of the world. This means that we need to be near enough to users to fulfil them, but far enough to still be able to give them the most reliable mail service possible. Ocean Mail Server Features: Optional ✓ Spam & Virus Protection - Use CAPTCHAs to increase login security, employ more advanced virus and spam methods. Use DNSBLs to prevent abuse from other spammers.

Integrate with other email and spam protection tools. ✓ Real-Time Protection - Protect against known and unknown threats with advance email monitoring and real-time checking. ✓ Clustering and Failover - Mitigate failure and planned downtime via a high available system. Optional ✓ SSL Support - Encrypt your email traffic in order to secure your email from eavesdroppers, spammers, and hackers. ✓ Root CA Support - Obtain an Intermediate CA certificate from a trusted CA organization and use it to verify your domain's validity. Optional ✓ Webmail - Allow users to log in and receive mail via a web interface. ✓ Auto-Responses - Automatically send a mail in response to new incoming mail. ✓ SPAM Control - This filter uses SpamAssassin and can even be integrated with your email service if you'd like to use it. ✓ Custom Configuration - Customize your setup to reflect your own needs. Optional ✓ Application Support - Find relevant and powerful software for use in your installation. ✓ LDAP - Allow users to access shared address book information and allow other software to query the server for existing users. ✓ ODBC - Store and control vital user information 09e8f5149f
